

Turbine Efficiency Group is delighted to announce the acquisition of Gas Turbine Applications Inc (“GTA”).

GTA is a highly-respected after-market services provider specialising in the Saturn and Centaur industrial gas turbines. The business serves a longstanding customer base operating from facilities strategically located in Calera, OK.

The acquisition creates a leading independent service provider delivering a world-class offering for a wide range of IGTs (SGT-100, SGT-200, SGT-300, TA, TB, Saturn, Centaur). The enlarged group will leverage its combined capabilities to service new and existing customers from overhaul facilities in the UK and US, and regional offices in Aberdeen and Dubai.

GTA will be led by Managing Director Rob Leach (previously MD, Brush USA) supported by Operations Manager, Mark Blake who is remaining with the business.

Chris Turner, CEO of Turbine Efficiency, commented: *“The acquisition of GTA represents the exciting completion of a key strategic objective in the ambitious expansion plans for Turbine Efficiency, bringing with it the extension of our global footprint and the Turbine Efficiency brand into the critical Americas market. We welcome our new colleagues at GTA into the Turbine Efficiency family and look forward to working with them as we take both companies forward together”*

Turbine Efficiency Group and **Gas Turbine Applications** will be jointly exhibiting be at PowerGen International in Orlando. Come and meet the team and discuss your turbine service requirements with us – you will find us on booth 935.

Notes for Editors

About Turbine Efficiency

Founded in 2001 as an Independent Service Provider on the full range of Siemens industrial gas turbines from 1 – 15MW. Turbine Efficiency provides a world-class service for all maintenance, repair, overhaul and testing of your gas turbine and package. The group operates from a state-of-the-art overhaul facility in Lincoln, UK with offices in Aberdeen, Dubai & Houston, and resident Field Service Engineers in several key European locations. In 2016 TEL was acquired by Core Capital Partners, a mid-market private equity investor supporting high-growth UK companies.

About Gas Turbine Applications (“GTA”)

Founded in 1984, GTA is an independent service provider specialising in the Saturn and Centaur industrial gas turbines (Solar® Turbines products). GTA provides overhaul, repair and testing services for a longstanding customer base, primarily operating within the upstream and midstream sector, from its facility in Calera, OK.
